Hoshiarpur, Punjab, India

SUMMARY

Full-Stack Software Engineer with experience building scalable React-based web applications and REST APIs using the MERN stack. Skilled in developing end-to-end solutions across frontend, backend, and database layers. Experience deploying applications using AWS EC2, S3, and VPC.

EDUCATION

Chitkara University Punjab, India
Bachelor of Engineering in Computer Science; CGPA: 8.58/10.0 2023 – 2027

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL
Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, REST API Integration, Responsive UI Development
Backend: Node.js, Express.js
Databases: MongoDB, MySQL
Cloud & Deployment: AWS EC2, S3, VPC (Hands-on), Application Deployment
Tools: Git, Linux, Postman
Core Subjects: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks

EXPERIENCE

Full Stack Developer Intern Oct 2025 – Nov 2025
CodeAlpha, Lucknow

- Developed full-stack features including authentication, product management, and task workflows using Node.js, Express.js, and MongoDB
- Integrated backend APIs with application workflows to support seamless data flow and user interactions
- Implemented JWT-based authentication with role-based access control ensuring secure access across application modules
- Tested and debugged application workflows using Postman and logs to ensure reliable backend performance

Web Development Intern Sep 2025 – Oct 2025
SkillCraft Technology, Mumbai

- Built responsive frontend applications including To-Do App, Stopwatch, and interactive web tools using HTML, CSS, and JavaScript
- Implemented dynamic UI behavior using JavaScript for state handling and user interactions
- Designed reusable UI components and optimized layouts for cross-device compatibility

PROJECTS

Midnight Cravings – MERN E-Commerce Platform GitHub
React.js, Node.js, Express.js, MongoDB

- Built a full-stack MERN-based e-commerce platform addressing hostel-based food ordering use cases
- Designed REST APIs for product listing, cart management, order processing, and authentication
- Implemented JWT-based role-based access control for Admin, Seller, and Student users
- Deployed the application on AWS using EC2 with static assets hosted on S3 and configured networking using VPC
- Tested application workflows across multiple user roles to ensure reliable system functionality

HireHub — Recruitment Management Platform GitHub
React.js, Node.js, Express.js, MySQL, Sequelize, JWT, Tailwind CSS

- Built a recruitment platform with JWT-based authentication, RBAC authorization, and company-level recruiter management.
- Designed an application lifecycle system with secure hiring state transitions and ownership validation.
- Developed scalable REST APIs using MySQL, Sequelize, Joi validation, and centralized error handling.

ACHIEVEMENTS

HackVega Hackathon Certificate
Awarded a Certificate of Merit for performance in the first round of a competitive hackathon
